SUMMARY

iOS engineer with 8+ years building and shipping native apps in **Swift**, including Lowe's e-commerce app for **20M+ users** and a real-time voice app at ResMed. I've migrated UIKit screens to **SwiftUI**, raised unit test coverage from **50% to 80%** on the Allstate app, and used Instruments to fix memory and performance issues. I take features from requirements through testing and App Store release, and work with backend and design teams on server-driven UI. I use GitHub Copilot to generate code and ChatGPT Enterprise for technical research.

TECHNICAL SKILLS

- **iOS:** Swift, SwiftUI, UIKit, Swift Concurrency (async/await), Combine, Xcode, Core Data, APNs, App Clips
- **Architecture:** MVVM, Clean Architecture, Coordinator, protocol-oriented design, dependency injection, server-driven UI
- **Testing:** XCTest, unit and integration tests, mocking
- **Performance:** Xcode Instruments, memory leak fixes, Firebase Crashlytics
- **CI/CD & release:** GitHub Actions, TestFlight, App Store Connect, remote config, feature flags
- **APIs:** REST, JSON, WebSocket
- **Ways of working:** Code review, Agile/Scrum, AI-assisted development (GitHub Copilot, ChatGPT Enterprise)

EXPERIENCE

iOS Engineer — ResMed

Bangalore, India · May 2025 – Present

- Build the iOS side of a real-time sleep therapy companion in **SwiftUI** with **Swift Concurrency**: persistent **WebSocket** audio streaming, live transcription and voice playback.
- Wrote the RFC for a **vendor-neutral logging and analytics event system**, so the analytics provider can be changed without touching call sites.
- Built the voice experience on ElevenLabs, then upgraded it to Amazon Nova Sonic to improve the user experience, using a remote config flag to switch between them.
- Work on the iOS CI/CD pipeline on GitHub Actions, with remote-config feature toggles and TestFlight distribution.
- Write unit and integration tests for new features, and help junior engineers with SwiftUI and async/await.
- Use **GitHub Copilot** to generate code for features and **ChatGPT Enterprise** to research technical approaches.

SDE 2, iOS — Lowe's India

Bangalore, India · Feb 2024 – May 2025

- Migrated the server-driven Home screen of an e-commerce app serving **20M+ users** from UIKit to **SwiftUI**.
- Worked with backend and design teams on mapping server-driven components to the design system.
- Built the Styles for You and Store Deals personalization features.
- Used **Xcode Instruments** to fix scroll stutter and memory growth on high-traffic screens.
- Fixed a crash in the Black Friday / Cyber Monday build days before code freeze.
- Fixed SonarQube code-quality issues across team codebases.

Software Engineer, iOS — Collabera Digital (Client: Lowe's India)

Bangalore, India · Jan 2023 – Feb 2024

- Co-developed the **Lowe's App Clip**, including the existing Store Maps experience, before moving to a full-time role at Lowe's.
- Integrated another team's server-driven UI components into the App Clip, keeping it consistent with the main app.

Software Engineer, iOS — Infosys (Clients: Allstate, Philips)

Remote · Jun 2021 – Jan 2023

- Improved the testing setup for core modules of the Allstate insurance app and raised unit test coverage from **50% to 80%** with XCTest.
- Migrated legacy UIKit components to **SwiftUI**.
- Used Instruments to find and fix memory leaks across key modules.

Software Engineer, iOS — Tech X Infosolutions
Remote · Feb 2020 – May 2021

- Delivered client iOS apps end to end in Swift and UIKit, from requirements to App Store release.
- Integrated REST APIs, Firebase, Google Maps and payment gateways across several products.

Assistant Software Engineer, iOS — Trendsetters IT Pvt Ltd
Lucknow, India · Jan 2018 – Feb 2020

- Built iOS apps from scratch in Swift and UIKit, and ran TestFlight and App Store releases independently.
- Integrated Facebook, Google and Apple Sign-In.

RECOGNITION

- **Individual Excellence Award**, Lowe's India (Feb 2025), for contributions across the iOS app.
- **Spot Award**, Lowe's India (Sep 2024), for fixing a defect that put an in-app sponsorship deal at risk.

EDUCATION

B.Tech, Computer Science — BBDNITM, Lucknow, India · 2012 – 2016
